# Team 35 Iteration 1 Retrospective

| What went well? | 1. Everyone knew what they were supposed to do<br>2. Scope was achievable<br>3. User stories were clear and specific |
|---|---|
| What could have been done better? | 1. Follow definition of done better<br>2. Communicate what task each team member is currently doing (have more meetings) |
| What will we try next? | 1. Update definition of done to be more specific<br>2. More communication between team members<br>3. Brainstorming what's useful or valuable for the end user |
| What questions do we have? | 1. What functionality we can include that's valuable to the end user<br>2. Is a linear line for calculating too basic/not valuable for this project? |
